

Sprint # 1

Total Points Possible: 60 points

Team Grade		Points Earned
Team: A - 1	Total: 60	
(25 points) Project Demonstration: You will schedule a time during the Week of March 11th, to demonstrate your completed user stories and your unit tests that show these user stories work. You will provide to your reviewers the appropriate user acceptance tests that you will also be running to show the user functionality they will have in this iteration.		25
(10 points) Spring Backlog and Scrum Meeting documentation: The Sprint Backlog is a subset of the Product Backlog of the requirements that are being implemented during the sprint. A report of the Scrum Meeting consists of the answers to the modified version of the “three questions”.		10
(15 points) Description of the User Stories and Test Cases completed during the sprint: Provide a detailed description of the user stories and test cases <u>that were completed</u> during this sprint utilizing the SOA architecture and Android app development introduced in this course.		15
(10 points) Team Reflection: What did each member work on, what was accomplished, what worked during this iteration, what issues you encountered, how might you need to modify your goals for Sprint 2.		10

Note: Individual overall grade may be reduced if Personal Contribution Survey was not completed or for low personal contribution ratings by teammates.

Grading Comments:

Well Done!

Sprint # 1

Total Points Possible: 60 points

Team Grade		Points Earned
Team: A - 2	Total: 60	
(25 points) Project Demonstration: You will schedule a time during the Week of March 11th, to demonstrate your completed user stories and your unit tests that show these user stories work. You will provide to your reviewers the appropriate user acceptance tests that you will also be running to show the user functionality they will have in this iteration.		25
(10 points) Spring Backlog and Scrum Meeting documentation: The Sprint Backlog is a subset of the Product Backlog of the requirements that are being implemented during the sprint. A report of the Scrum Meeting consists of the answers to the modified version of the "three questions".		10
(15 points) Description of the User Stories and Test Cases completed during the sprint: Provide a detailed description of the user stories and test cases <u>that were completed</u> during this sprint utilizing the SOA architecture and Android app development introduced in this course.		15
(10 points) Team Reflection: What did each member work on, what was accomplished, what worked during this iteration, what issues you encountered, how might you need to modify your goals for Sprint 2.		10

Note: Individual overall grade may be reduced if Personal Contribution Survey was not completed or for low personal contribution ratings by teammates.

Grading Comments:

User registration and log-in functionality works. The app is off to a good start! I look forward to seeing more in the next sprint. Espresso tests look good for the current implementation. I prefer the Scrum meeting log broken down to smaller documents; the document with all of our meetings is too small to read easily.

Sprint # 1

Total Points Possible: 60 points

Team Grade		Points Earned
Team: A - 3	Total: 50	
(25 points) Project Demonstration: You will schedule a time during the Week of March 11th, to demonstrate your completed user stories and your unit tests that show these user stories work. You will provide to your reviewers the appropriate user acceptance tests that you will also be running to show the user functionality they will have in this iteration.		25
(10 points) Spring Backlog and Scrum Meeting documentation: The Sprint Backlog is a subset of the Product Backlog of the requirements that are being implemented during the sprint. A report of the Scrum Meeting consists of the answers to the modified version of the "three questions".		5
(15 points) Description of the User Stories and Test Cases completed during the sprint: Provide a detailed description of the user stories and test cases <u>that were completed</u> during this sprint utilizing the SOA architecture and Android app development introduced in this course.		10
(10 points) Team Reflection: What did each member work on, what was accomplished, what worked during this iteration, what issues you encountered, how might you need to modify your goals for Sprint 2.		10

Note: Individual overall grade may be reduced if Personal Contribution Survey was not completed or for low personal contribution ratings by teammates.

Grading Comments:

User registration and log-in functionality works. The app is off to a good start! It looks like you didn't start the sprint until the week of March 11. I only see 5 Scrum meeting notes. I look forward to seeing more in the next sprint. I don't see any Espresso tests in the repo; you don't want to manually execute the test cases that you have documented.

Sprint # 1

Total Points Possible: 60 points

Team Grade		Points Earned
Team: A - 4	Total: 45	
(25 points) Project Demonstration: You will schedule a time during the Week of March 11th, to demonstrate your completed user stories and your unit tests that show these user stories work. You will provide to your reviewers the appropriate user acceptance tests that you will also be running to show the user functionality they will have in this iteration.		20
(10 points) Spring Backlog and Scrum Meeting documentation: The Sprint Backlog is a subset of the Product Backlog of the requirements that are being implemented during the sprint. A report of the Scrum Meeting consists of the answers to the modified version of the “three questions”.		10
(15 points) Description of the User Stories and Test Cases completed during the sprint: Provide a detailed description of the user stories and test cases <u>that were completed</u> during this sprint utilizing the SOA architecture and Android app development introduced in this course.		5
(10 points) Team Reflection: What did each member work on, what was accomplished, what worked during this iteration, what issues you encountered, how might you need to modify your goals for Sprint 2.		10

Note: Individual overall grade may be reduced if Personal Contribution Survey was not completed or for low personal contribution ratings by teammates.

Grading Comments:

Your team sprint retrospective gave a clear concise view of the lessons learned from this first sprint regarding communication. Please use the template to record your Scrum meetings as they occur rather than a single image uploaded at the end; only 4 meetings are documented. There appears to be very little work done during the first sprint. Demonstration had limited functionality

Sprint # 1

Total Points Possible: 60 points

Team Grade		Points Earned
Team: A - 5	Total: 50	
(25 points) Project Demonstration: You will schedule a time during the Week of March 11th, to demonstrate your completed user stories and your unit tests that show these user stories work. You will provide to your reviewers the appropriate user acceptance tests that you will also be running to show the user functionality they will have in this iteration.		20
(10 points) Spring Backlog and Scrum Meeting documentation: The Sprint Backlog is a subset of the Product Backlog of the requirements that are being implemented during the sprint. A report of the Scrum Meeting consists of the answers to the modified version of the "three questions".		10
(15 points) Description of the User Stories and Test Cases completed during the sprint: Provide a detailed description of the user stories and test cases <u>that were completed</u> during this sprint utilizing the SOA architecture and Android app development introduced in this course.		10
(10 points) Team Reflection: What did each member work on, what was accomplished, what worked during this iteration, what issues you encountered, how might you need to modify your goals for Sprint 2.		10

Note: Individual overall grade may be reduced if Personal Contribution Survey was not completed or for low personal contribution ratings by teammates.

Grading Comments:

Your team sprint retrospective accurately emphasized the importance of communication between team members and documenting meetings. I see a test plan uploaded, but no Espresso or Mockito tests. Several errors in demonstration of working app.

Sprint # 1

Total Points Possible: 60 points

Team Grade		Points Earned
Team: A - 6	Total: 60	
(25 points) Project Demonstration: You will schedule a time during the Week of March 11th, to demonstrate your completed user stories and your unit tests that show these user stories work. You will provide to your reviewers the appropriate user acceptance tests that you will also be running to show the user functionality they will have in this iteration.		25
(10 points) Spring Backlog and Scrum Meeting documentation: The Sprint Backlog is a subset of the Product Backlog of the requirements that are being implemented during the sprint. A report of the Scrum Meeting consists of the answers to the modified version of the “three questions”.		10
(15 points) Description of the User Stories and Test Cases completed during the sprint: Provide a detailed description of the user stories and test cases <u>that were completed</u> during this sprint utilizing the SOA architecture and Android app development introduced in this course.		15
(10 points) Team Reflection: What did each member work on, what was accomplished, what worked during this iteration, what issues you encountered, how might you need to modify your goals for Sprint 2.		10

Note: Individual overall grade may be reduced if Personal Contribution Survey was not completed or for low personal contribution ratings by teammates.

Grading Comments:

Scrum meeting documentation is very difficult to read; please either use the template or organize it so that it can be read from either one or two documents.

Sprint # 1

Total Points Possible: 60 points

Team Grade		Points Earned
Team: A - 7	Total: 52	
(25 points) Project Demonstration: You will schedule a time during the Week of March 11th, to demonstrate your completed user stories and your unit tests that show these user stories work. You will provide to your reviewers the appropriate user acceptance tests that you will also be running to show the user functionality they will have in this iteration.		25
(10 points) Spring Backlog and Scrum Meeting documentation: The Sprint Backlog is a subset of the Product Backlog of the requirements that are being implemented during the sprint. A report of the Scrum Meeting consists of the answers to the modified version of the "three questions".		7
(15 points) Description of the User Stories and Test Cases completed during the sprint: Provide a detailed description of the user stories and test cases <u>that were completed</u> during this sprint utilizing the SOA architecture and Android app development introduced in this course.		10
(10 points) Team Reflection: What did each member work on, what was accomplished, what worked during this iteration, what issues you encountered, how might you need to modify your goals for Sprint 2.		10

Note: Individual overall grade may be reduced if Personal Contribution Survey was not completed or for low personal contribution ratings by teammates.

Grading Comments:

Do not upload Microsoft office documents. Use markdown for version control documents. Only 7 Scrum meetings. It sounds like the team learned a lot about communication and how to divide work during the first sprint - keep this in mind as you move forward.

Sprint # 1

Total Points Possible: 60 points

Team Grade		Points Earned
Team: A - 8	Total: 58	
(25 points) Project Demonstration: You will schedule a time during the Week of March 11th, to demonstrate your completed user stories and your unit tests that show these user stories work. You will provide to your reviewers the appropriate user acceptance tests that you will also be running to show the user functionality they will have in this iteration.		23
(10 points) Spring Backlog and Scrum Meeting documentation: The Sprint Backlog is a subset of the Product Backlog of the requirements that are being implemented during the sprint. A report of the Scrum Meeting consists of the answers to the modified version of the “three questions”.		10
(15 points) Description of the User Stories and Test Cases completed during the sprint: Provide a detailed description of the user stories and test cases <u>that were completed</u> during this sprint utilizing the SOA architecture and Android app development introduced in this course.		15
(10 points) Team Reflection: What did each member work on, what was accomplished, what worked during this iteration, what issues you encountered, how might you need to modify your goals for Sprint 2.		10

Note: Individual overall grade may be reduced if Personal Contribution Survey was not completed or for low personal contribution ratings by teammates.

Grading Comments:

Sprint retrospective is clear and concise; is there anything about the way the team worked together that you're planning to change for Sprint 2? Code and Espresso tests look good! Minor error with Toast in demo, but overall a very good start.

Sprint # 1

Total Points Possible: 60 points

Team Grade		Points Earned
Team: B - 1	Total: 40	
(25 points) Project Demonstration: You will schedule a time during the Week of March 11th, to demonstrate your completed user stories and your unit tests that show these user stories work. You will provide to your reviewers the appropriate user acceptance tests that you will also be running to show the user functionality they will have in this iteration.		25
(10 points) Spring Backlog and Scrum Meeting documentation: The Sprint Backlog is a subset of the Product Backlog of the requirements that are being implemented during the sprint. A report of the Scrum Meeting consists of the answers to the modified version of the "three questions".		5
(15 points) Description of the User Stories and Test Cases completed during the sprint: Provide a detailed description of the user stories and test cases <u>that were completed</u> during this sprint utilizing the SOA architecture and Android app development introduced in this course.		10
(10 points) Team Reflection: What did each member work on, what was accomplished, what worked during this iteration, what issues you encountered, how might you need to modify your goals for Sprint 2.		0

Note: Individual overall grade may be reduced if Personal Contribution Survey was not completed or for low personal contribution ratings by teammates.

Grading Comments:

Please add all team member names and roles to the README file. Scum meeting documentation is not in the correct format and you are not answering all five questions - a summary is not acceptable. I don't see 10 scrum meeting for this sprint.

Nice work on implmenting the user stories for this sprint! I don't see a test plan or automated tests (Espresso or Mockito) for the completed user stories. I couldn't find your Sprint Retrospective document in the team repository.

Sprint # 1

Note: Individual overall grade may be reduced if Personal Contribution Survey was not completed or for low personal contribution ratings by teammates.

Grading Comments:

Please include the name and role of each team member in the README file. Great demo for sprint 1!

I only see 2 scrum meetings for sprint 1.

The retrospective is just an outline - this should be a more formal document that will be read by your client; an outline is insufficient.

I don't see a test plan or any automated tests written in Espresso or Mockito
